**Genes
Description**

- | | |
|--|--|
|  hypothetical protein, conserved |  mitochondrial-processing peptidase subunit alpha, putative |
|  50S ribosomal protein L17, apicoplast, putative |  heptatricopeptide repeat-containing protein, putative |
|  inner membrane complex protein |  cytochrome c oxidase subunit ApiCOX18, putative |
|  iron-sulfur assembly protein |  DnaJ protein, putative |
|  pre-mRNA-splicing factor BUD31, putative |  dynein light chain Tctex-type, putative |
|  zinc finger protein, putative |  conserved Plasmodium membrane protein, unknown function |
|  multidrug resistance protein 1 (pfmdr1) | |
